Dear Listener

I am pleased to verify your radio reception of CFYN 1050, on the 25th of January 1982.

We operate a 10KW day, and 2.5KW night, using a new Harris MW 10-A solid state Pulse Duration Modulator, and a Dourrough audio processor.

We utilize a single tower, omni-directional day, and a two tower array at night.

I am enclosing a flyer published two years ago, when we first moved in to our studios specially constructed for our operations.

I'm also including stickers for your collection.

Yours truly

Russ Hilderley
President & General Manager
